## 'People Won't Go To See a Loser'

By Chuck Barry

"People don't go out to see a loser," stated alumnus Lloyd Berg, Vice President and Account Executive for Pleskach and Smith Advertising Agency.

At the Student Activities Committee meeting Tuesday Berg observed that as this football season started, participation by spectators was good. "But, as the team lost, participation dwindled down to nothing."

He charged that Omaha University has an "it isn't important who wins or loses, but, how many paid to get into the game" attitude.

After noting that "athletic talent has to be paid for," he suggested that OU:

—Step up the athletic grants-in-aid program.

—Review plans for a dormitory.

—Get more alumni interested in OU sports.

—Look for an easier conference to play in.

—Hire coaches who can first coach and secondly teach.

On publications, Berg said that students need more on-the-job training in the advertising and public relations fields.

### More Clinics

"The Gateway does this well," he noted explaining that "30 days of practical experience in any of these areas is equivalent to three years of book learning."

He called for more communication clinics and for graduates with more education in English and history.

Berg then accepted an offer to act as an un-official advisor to the sub-committee investigating publications when they make up their recommendations.

"I am getting tired of hearing people say that 70 per cent of our student body works," said Committee member and Student Council President Lyle Franzen. "Let's get a program for them to participate in when they are available."

### Surveys Inconclusive

Blaming lack of promotion for non-attendance at OU sporting events, Franzen called for a stepped-up program aimed at telling the student what and when something is going to happen.

He acknowledged that three recent surveys on athletics did not go over very well with the student body and were inconclusive.

However, from his own "personal survey" he said that "students want a continuation of the current program and strengthening if possible."

### More Intramurals

Franzen also advocated getting a dormitory and increasing the grants-in-aid program.

Larry Schmidt, committee member and representative of the Inter-fraternity Council, presented a set of figures calling for not necessarily a de-emphasis on intercollegiate sports, but definitely an emphasis on Inter-mural sports.

He asked for an increase in the intramural budget, more physical education teachers to work in the program, insurance for participants and more equipment. Schmidt said he would also like to see OU get a swimming pool and physical education building.

## Ma-ie Day Rules, Regulations Announced by Student Council

Rules governing Ma-ie Day participation and the princess election have been announced by the student council.

The floats will be judged three times as are the cars.

No float may stand more than 12 feet high. They must be in the fieldhouse no later than 9 p.m. Thursday and work must be completed by midnight.

## Beyond 30

By Ken Zimmerman

Have you ever watched a young man die?

Have you ever seen a human being lose the existence he was created to magnify?

If you had stood across Dodge Street from this campus at 1:45 a.m. Tuesday you would have seen the horrible merge of flesh, metal and sped mangled together in death.

You would have seen an automobile transmission pressed against a front seat by the violent impact of car against tree; a steering wheel driven to the ceiling by terrible concussion.

You would have seen an engine block crashing through a radio that had just reported a death-free day on Nebraska highways.

You would have seen heavy steel bolts stripped of their threads as tremendous forces ripped them from their emplacements.

You would have seen a man whose very purpose lay ahead of him hurled through a shattered windshield.

You would have seen life-blood splashed over a steering wheel, across a dashboard, drop to the cold pavement then trickle to the curb.

You would have seen an arm go limp as life departed.

You would have seen a twisted body lifted from silent, unbelievable wreckage.

You would have shuddered, sighed, murmured a comment, then gone on your way.

You would have seen a young man die.

Between the John Birch Society and the House Un-American Activities Committee, English Instructor Bruce Baker decided to remove "Old Red" from his reading list.

## Waakiya Meet Knowledge in Psychology Is 'Fragmentary'

### Auction Marks Library Week; 200 Books Sold

Library Week, which began Monday, was accented by a book auction at the Gene Eppley Library.

About two hundred volumes were offered to the highest bidders in a closed bid sale in the main foyer of the library. The winning prices will be announced next week.

M. R. McCaulley, reference librarian, said that show windows in both the book store and the library were specially fitted to stress a "let's read" theme.

Psychology seems to be a subject which has caught the public's fancy in this country. However, as is often the case, this focusing of attention has done little to increase general understanding.

People interested in psychology or in need of aid from it frequently misunderstand the present state of knowledge in the field. They see the psychologist as an omnipotent creature.

In truth, knowledge in psychology today is quite fragmentary. We live in an era of so-called "miniature systems." Every psychologist seems to have his own pet ideas designed to handle his own favorite problems, but no single great man has emerged to synthesize these bits and pieces.

American psychologists have been prone to abuse or misuse statistics. In a desperate attempt to carry out "critical" experiments, statistical technique and sophistication have often displaced a thorough grasp of general procedure and a recognition of the need for repetition of experiments to permit cross checks before publication.

The error of the research psychologist in attempting to generalize on the basis of a single study has become so glaring that he has recently found himself under attack by statisticians themselves.

In summary, our present store of psychological information is exceedingly limited and some of the techniques that are being used to expand our knowledge are open to serious question.

What does all of this mean for the University of Omaha?

First, it has a definite bearing on the new psychology program which places emphasis squarely

on the research orientation that has been described.

Secondly, it indicates in part why the Department of Psychology is currently considering the addition of an extra year of work at the graduate level—including a practicum—for those preparing for industrial or educational work.

Finally, it may suggest the

direction that research in the Bureau of Industrial Testing and Institutional Research, the Child Study Clinic, and the experimental laboratory will take.

Perhaps through our research and study we at Omaha University can contribute to the elimination of the gaps in information and the misunderstandings which have been noted.

## Hobbled Thinclads Host Triangular

Omaha University's injury-riddled track team hosts Doane and Nebraska Wesleyan in a triangular this Wednesday.

Only 12 men are expected to be ready.

Top attraction of the meet should be the personal duel between OU's Roger Sayers and Doane's Clinton Skinner. Skinner was soundly beaten by Sayers in the indoor season, but vowed he would give a better account of himself in the outdoor season.

Coach Lloyd Cardwell said that he feels Skinner is good for a 9.8 century and Sayers, a 9.7. The two should also clash in the 220.

Last Tuesday, the Indians finished second behind Dana in a triangular here. Dana piled up 71 points, QU, 51½ and Midland, 37½.

Omaha, with three men out of commission, still managed to finish first in eight events. Dennis Dunning won the half-mile, the mile, and ran a leg on the winning mile relay team. Sayers took the 100, 220, and also ran a leg on the same relay team.

A week ago today, South Dakota downed the Indians 74 to 52.
